* 2. Does your institution offer centralized Disaster Recovery/Business Continuity (DR/BC) services?

☐ Yes

☐ No

Disaster Recovery - Additional

1. Does your institution provide failover servers at an offsite location?

☐ Yes

☐ No

2. Does your institution maintain "hot" failover DR/BC sites?

(A "hot" site is constantly synchronized, and takes over immediately if the primary site is unavailable)

☐ Yes

☐ No

3. Does your institution maintain "warm" failover DR/BC sites? (A "warm" site is synchronized on an hourly, daily, or weekly schedule, and takes over after a short time if the primary site is unavailable.)

☐ Yes

☐ No

4. Does your institution maintain "cold" failover DR/BC sites? (A "cold" site is a standby server that can be made available and brought online with backup copies of data, generally involves a longer delay between the primary going offline and the failover site taking over.)

☐ Yes

☐ No

5. Does your institution use virtual servers, in environments such as VMWare, in failover sites?

☐ Yes

☐ No

Disaster Recovery

6. Does your institution use "cloud"-hosted servers, such as Amazon's Amazon Elastic Compute Cloud (EC2) service offering, for failover sites?

☐ Yes

☐ No

7. Does your institution maintain alternative worksites for critical personnel in the event of primary workspaces becoming unusable due to emergencies?

☐ Yes

☐ No
