T4W1 Degausser

**Meets
NSA/CSS
EPL-9-12A-E**

GSA Price: \$24,975.00

intimus® T4W1

The **intimus® T4W1** manufactured by Proton Inc. is engineered to provide robust degaussing features for hard drive media up to 5,000 Oe and tape media up to 2,800 Oe. These are the maximum media coercivities available today and the maximum coercivity available for NSA test purposes. The Proton T-4 actually produces 40,000 gauss uniform fields (4 Tesla) and usual NSA requirements are three times the flux versus media coercivity. If this general requirement is extrapolated, the Proton T-4 with 4 Tesla should reliably degauss media with a coercivity of 13,330 Oe. In simple terms, the Proton T-4 will not be outdated soon and will degauss your magnetic media for many years to come. No other degausser compares. Destruction of confidential, sensitive and classified data is in accordance with recognized standards and provides compliance under FACTA, HIPAA, GLB, DPA, etc. There is minimal training required to use this machine. **Five year warranty. Deployment kit option AVAILABLE**

BUNDLE DEAL!!!!

**Buy the T-4 and 1001 as
a package and pay
\$48,475.00**

**a savings of \$5,000 off

Magnetic Field Intensity:	Up to 13,330 Oe
Magnetic Flux Density:	40,000 G
Erasure Cycle Time:	< 1 minute
Tape & non-HDD Media Capacity:	All dimensionally within 1" x 6" x 4.3"
Duty Cycle:	Continuous
Power / Amps:	8 @ 120 Volts, 4 @ 240 Volts
Weight:	128 lbs.
Dimensions:	10" W x 19" H x 26" D

Hard Drive Shredder

The **TERMINATOR DMD1001** will handle all your Multimedia destruction needs and do it in an office environment. Hard Drives, CDs, Cell phones, PDAs, back up tapes and much more. This unique unit is the only Hard Drive shredder in the market place that will plug into a standard office wall socket and its industrial casters and small foot print allows it to be moved from department to department. Unlike competitive units it truly will do a standard HDD not just a lap-top drive and won't require costly maintenance after sixty days due to excessive build up of magnets and material in the cutting chamber. Our unit by itself weighs almost 300lbs. more than the competitive model.

GSA Price: \$27,500.00

Electrical:	1 HP
Power Requirements:	115V, 1PH, 60Hz
Feed Opening:	1-1/2" x 4-1/2"
Throughput:	Up to 500 HDD/hr
Shaft Diameter:	2-7/16"
Cutter Thickness:	1-3/8"
Dimensions:	44"L x 24"W x 48"H
Weight:	1,000 lbs.

intimus® Terminator DMD1001

Converts Hard Drives into SCRAP

Easy to use controls

 Shredder cabinets are made of 60% consumer recycled material
